

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## DEPARTMENT OF NOTES AND REVIEWS

It is the purpose, in this department, to present from time to time brief original notes, both of methods of work and of results, by members of the Society. All members are invited to submit such items. In addition to these there will be given a few brief abstracts of recent work of more general interest to students and teachers. There will be no attempt to make these abstracts exhaustive. They will illustrate progress without attempting to define it, and will thus give to the teacher current illustrations, and to the isolated student suggestions of suitable fields of investigation.—[Editor.]

### THE NEW TREASURER

Owing to press of duties, Dr. H. J. Van Cleave, at the end of his three year term, has felt it necessary to offer his resignation as Treasurer of the American Microscopical Society. In as much as no meeting of the Society was held in 1918, this resignation was acted on by the Executive Committee. In accepting Dr. Van Cleave's resignation the Committee in both formal and personal ways recorded their great regret and their thanks to him for a most capable and constructive administration of the office.

Mr. Wm. F. Henderson, Instructor in The James Millikin University, Decatur, Illinois, was named Treasurer for the ensuing term, subject to ratification at the next constitutional meeting.

### THE PROBLEMS OF THE FUTURE

The Secretary wishes to call the attention of the Society to the fact of the great loss, especially among our younger members, during the last four years. This is neither a surprising, unique, nor prostrating experience. It is common among societies of this kind. It does, however, call for heroic and thoroging coöperation among the membership.

I am sure that every member of the American Microscopical Society has confidence that science and scientific research will not suffer permanently after the war. Whatever of our predilections and practises have been shown to be either ineffective or false by the events of the war, science and scientific men showed that the future is helpless without them.

Our own Society, publishing as it does from 300 to 400 pages each year of the results of research in fundamentally important fields of human interest, ought to enter firmly and confidently into its portion
